

These forms are also needed when you change daycares. They're necessary for times like the upcoming school break as well. If your child usually stays at ASP (After School Program), but they'll have to go to a regular daycare during the break, we'll need these forms filled out to change them from ASP to regular daycare.

You don't have to use these forms and take this on yourself. Some families expressed that they would rather take care of everything they can do to make sure there are no glitches w/the daycare system. If you wanted, you could fill out the form, have the daycare/provider fill out the other two sheets and then forward them back to your case manager. The form 57 has to be signed the by case manager before the daycare will be approved.

Remember, we have to complete these forms before the daycare can begin. You should tell the worker EACH time you get a child that daycare will be needed to ensure these forms are processed.
